EXPERIENCE

Mitra Informasi Informatika (MII)

Cloud Engineer

April 2023 – October 2025

- Use Terraform in GCP to provision IAM service accounts, VPC networking, compute resources, and persistent storage helping reduce misconfiguration accident, and increase deploying speed through automated state management.
- Use Ansible in Nutanix HCI and VMware ESXi to automate software security, versioning, and license auditing process, and scripting ensuring security compliance, and rapid change distribution for distributed virtual machines.
- Manage, and fixing pod and cluster on AKS (Azure Kubernetes Service) service deployments.
- Developed container utilities service in Go using API, Gin, and webhook event from monitoring to improve uptime by automating service recovery process.
- Developed payment gateway feature to process transaction initiation, encryption, authorization, webhook event, capture, and settlement using PHP and MariaDB database to achieve secure and no conflict payment process.
- Developed log ingest service in Go using Open Telemetry SDK, GCP Pub/Sub, and Logs Router to filter logs from service into Google Cloud Monitoring and Datadog.
- Use Azure and Google Cloud FinOps Cost Management and Advisor to optimize cost by implemented disk redundancy, storage lifecycle, Rightsizing and Forecasting policies.
- Supported the incident response team during an Akira ransomware incident in root cause analysis and virus containment, followed with sanitization and redeployment of IT infrastructure to restore critical business services.
- Use Microsoft Sentinel to perform security analysis, reporting anomaly behavior, and advocating troubleshooting and remediation of infrastructure, service, and user security threats and incidents.
- Optimized BigQuery and VM cost using slot reservations, dynamic disk resizing, and usage limiting alerting result in approximately 30% reduction in cloud cost.
- Leading small team to migrate PostgreSQL database to Cloud SQL via WAL CDC using pglogical, NiFi, Kafka, Airflow to proxy machine for Cloud SQL via private tunnel from on-prem DC achieving approximately 30 percent faster ongoing migration with more than 3 Tb data moved.
- Fixing system reliability and performance by diagnosing critical I/O bottlenecks and resource contention across overutilized compute, databases, and network.

EXPERIENCE

- Transitioning from Jenkins to GitHub Actions streamlining the delivery of production, integration testing, DAST and SAST testing, and deployment applications to Managed Compute Engine, and Compute Engine resulting in reducing CI/CD maintenance overhead.
- Developed database recovery process using WALL-G, Bash, Linux and Google Cloud Storage to established immutable database backup system for on-prem and cloud through recovery drills to meet financial regulatory requirements.

Personal Projects

Ivy (UnifyAI) - (Python, Docker) PR #10178
Contributed to the Ivy (Unify.ai) open-source framework with adding new backend bridging function and test unit

Zalik-OS - (C, RISC-V, Docker) Github
Developed minimal OS kernel from scratch.

Win11Stop - (Python) Github
Developed program to pausing annoying program from vendor or OS in Windows

Skills

- Programming Language - Python, Go, Bash, C
- Google Cloud - Compute Engine, Billings, Google Kubernetes Engine, Cloud Run, Cloud Storage, Cloud SQL, VPC, BigQuery, Cloud Load Balancing, Identity and Access Management (IAM), Reserve Cost (Committed Use Discounts (CUDs), Sustained Use Discounts (SUDs)), Cloud Logging, Cloud Monitoring, App Engine
- Azure Cloud - Azure Virtual Machines, Azure Kubernetes Service, Microsoft Sentinel, Microsoft Entra ID, Azure SQL Database, Azure Monitor Logs, Azure Monitor Metrics
- Ops - IaC - Terraform, Ansible - Prometheus, Grafana, SolarWind
- Database Software - PostgreSQL, MongoDB, MariaDB, SQLite
- Infra - Data Software - VMWare, Nutanix - Kafka, NiFi

Education

Sebelas Maret University

Bachelor of Mathematics

Professional Certification

- Professional Google Cloud Architect.
- Google Cloud Engineer Associate
- Azure Administrator Associate
